

Online Training

Legionnaires Disease

The aim of this training course is to provide you with the information to understand the health risks associated with Legionnaires' disease. It explains your duties under law and how to control those risks.

EazySafe

EazySafe are the experts in online safety training. Our courses are engaging and user-friendly while the platform offers **simplicity** and **flexibility** for both the learner and the trainer. Online training can be taken in advance or on-site. For more information on delivering inductions or other online training to your employees or contractors, please contact us for a trial.

Reduce training costs and increase flexibility
